Skills

Languages & Frameworks: JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js

Databases & Tools: MongoDB, AWS, EC2, Git, GitHub Actions (CI/CD)

Work Experience

Innovate Solution

Feb 2023 - Present

Junior Software Engineer → Senior Software Engineer (Frontend)

- Joined as a Junior Developer and quickly rose to lead a frontend team of 5–7 developers, demonstrating strong technical and leadership skills.
- Spearheaded the design and development of 20+ scalable, responsive travel tech platforms, covering flight search, hotel booking, tours, visas, and transfer services, used by 10,000+ monthly active users.
- Built and optimized high-performance UIs with React.js and Next.js, improving page load time by 40% and boosting Lighthouse performance scores to 90+.
- Collaborated with backend engineers and stakeholders in bi-weekly agile sprints, ensuring 95% on-time delivery of new features and product releases.
- Established CI/CD pipelines with GitHub Actions, reducing deployment time by 60% and minimizing manual errors.
- Mentored 4 junior developers, conducted regular code reviews, and enforced consistent coding standards, improving overall code quality and maintainability.
- Contributed directly to the company's growth from an early-stage startup to a competitive player in the travel tech sector, helping scale the platform to serve clients in 7+ countries.

Projects

- B2B Online Travel Agency (OTA):** Developed a scalable SaaS-based B2B Online Travel Agency (OTA) web application used by over 50 domestic and international clients, each with more than 1,000 active agents. Built the frontend with Next.js to deliver a high-performance, responsive experience across modules like flights, hotels, tours, and transfers. Continuously maintained and improved the platform with my team, implementing CI/CD pipelines using GitHub Actions for automated deployment and reliable updates.
- B2C Online Travel Agency (B2C):** Developed multiple high-performance B2C Online Travel Agency (OTA) web application enabling end-users to search, compare, and book flights, hotels, tours, and transfers in real time. Designed and built the frontend with Next.js for seamless user experience and optimized performance. Implemented CI/CD pipelines using GitHub Actions to ensure smooth deployment, continuous updates, and system reliability across production environments.
- Self-Hosted Pusher Service:** Developed a self-hosted real-time communication service using TypeScript, Node.js, and Socket.io, providing an alternative to third-party pusher platforms. Created and published a reusable NPM package to enable seamless integration and simplify event-based communication across multiple applications. Designed for scalability and maintainability with modular architecture and full TypeScript type safety.

Education

Northern University Bangladesh
B.Sc. in Textile Engineering

Jan 2021 - Aug 2024
CGPA: 3.32/4

Awards and Certificates

- Complete Web Development Course at Programming Hero.
- JavaScript Data Structure and Algorithm at freecodecamp.
